

More of Everything

Arlington

The Arlington is the plan for family convenience. It has ample storage space (note the large walk-in closet in the master bedroom and the coat closet in the foyer) and the large, open kitchen and breakfast area promote casual dining. The utility room is perfectly located to serve as both a mudroom and storage room. The large family room has a central fireplace and cathedral ceiling, and the separate living room is ideal for more formal entertaining (or concentrating on homework).

1,949 sq. ft.
